## **Organizational Announcement**

Please join me in welcoming Jennifer Ellis to Medacta USA as a Spine Operations Analyst.

Jen brings over 17 years of spinal distribution experience to Medacta USA. She began her career as an inventory specialist at Medtronic Sofamor Danek in 2000. After a short time she was promoted to Team Leader of all international and domestic set build operations.

In 2006, she transitioned to NuVasive and assisted with moving distribution operations from San Diego, California to Memphis, Tennessee. She quickly became a critical member of the distribution team and steadily increased her responsibilities throughout her tenure at NuVasive. Most recently, she was a supply chain planner responsible for set build and kitting operation planning, execution, and reporting.

As our Spine Operations Analyst, Jen will initially be responsible for sales support and supply chain planning for our spine business. As our spine business continues to grow, she will develop operation's spine business support model and spearhead logistical planning.

Please join me in welcoming Jennifer to the Medacta USA team!

Shawn McIntyre  
Director of Operations
